1 Visual M Installation

Overview of Visual M Installation. 1-1

Client Installation 1-1

Installing Visual M as Part of an Open M for Windows 95 and Windows NT Installation 1-1

Installing Visual M Separately. 1-2

Server Installation 1-3

Visual M Information Resources 1-6

The ReadMe File 1-6

The Visual M Tutorial. 1-6

The Visual M Help File 1-7

Visual M Demonstration Applications. 1-7

Installation and Configuration Information 1-7

2 Release Overview

Visual M Version 7.0 Features 2-1

Visual M Version 6.4 Features. 2-3

Visual M Version 6.3 Features. 2-4

Visual M Version 6.2 Features 2-7

A Visual M Version 7.0 Information

Visual M Version 7.0 New Features. A-1

MDeskTop Control Support for 32 Bit Visual Basic 4.0 . . . . . A-1
Open M [DTM] Changes A-2
MVB ElapsedTime Property A-3
MVB ErrorTrap Property A-3
MVB PromptInterval Property A-5
MVB MsgText Property A-7
MVB MServer Property A-9
New VisM Control A-11
VisM Execute Method A-14
SSVNs ^$ZMVBRUN and ^$ZMVBPROP Are No Longer Available A-14
Multibyte Character Functionality Added A-14
Change Open M for Windows 95 and NT Installation Wording A-14
Documentation Term Change A-15

Programming Tips A-16
Making a Long Visual M Query A-16
Setting the NameSpace Property for Improved Performance A-16

B Visual M Version 6.4 Information

Configuring Visual M B-1
Open M Platforms Supporting Visual M Server B-2
Visual M Clients B-2
Configuration of Visual M Client Systems B-3
Default Configuration B-4
Configuration of Visual M Server Systems B-6
Starting the Visual M Server B-7
Starting Multiple Visual M Servers B-9
Stopping a Visual M Server B-9

Converting Existing Applications to Visual M B-11
Use MakeFRX to Convert Code to a VB .FRX File B-11
Use the ToolName Property to Access Conversion Routines . B-12

The %mvbETRAP Local Variable B-15

The “Heartbeat” Monitor B-15
How the Heartbeat Monitor Facility Works B-15
Implementing the Heartbeat Monitor B-16

Default Number of Slave Servers on Open M [DTM] Systems B-17

Visual M Server Namespace Support B-17

Open M [DTM] Setup Kit B-17

Two New Sample Applications B-18

Visual M Version 6.4 Corrections B-18
Visual M Applications B-18
Open M DeskTop B-18
Visual M Server B-19

Troubleshooting B-19

C Visual M Version 6.3 Information

Installing and Configuring Visual M C-1
Installing Visual M on Client Computers. C-1
Converting Existing Visual M Applications C-2
Installing Visual M on Server Computers C-2
Configuring Visual M. C-3
Batching Visual M Messages C-3
Initiating Batching C-3
Determining Batch Status. C-3
Flushing the Batch Buffer C-3
Forced Flushes. C-4
Unforced Flushes. C-4
Determining the State of the Batch Buffer C-4
Effects of Batch Switch. C-5
Characteristics of Batching C-5
Sample Batch Program C-5
Some VB Functionality Not Available From M. C-6
Use On-Line Help for More Information C-6
Visual M and Open M DeskTop Tutorial C-6
Call VB DoEvents Function from M C-7
Execute Windows Executables with WinExec Function C-8
Update M’s Knowledge of Visual Basic Controls with ResetCtl Routine . . . C-9
Determine Context with $$InVB Function. C-9
Determine Server Type with $$Type Function. C-9
MVB Control C-10
PLIST Property. C-10
PDELIM Property C-10
MVB and MDeskTop Controls. C-11
MServer Property C-11
Open M DeskTop Editor. C-11
Routine Time Stamps C-11
Tab Conversion C-11
Macro Code Support. C-11
Insert/Overtype Mode. C-11
State Indicators C-12
Undo/Redo Buttons C-12
Tool Tips C-12
GoTo <label> [+offset] C-12
Accented Keys Accepted C-12

Line Overflow Checked C-12
Beep on Cut Without Selection C-12

Sample Applications and Globals C-13
Windows Printer Support Sample C-13
Generating Visual M Applications C-13
Sample Globals ^AreaCode and ^StAbbrev in OPENMDEMO C-13

Visual M Version 6.3 Corrections C-14

Visual M Version 6.3 Known Problems C-15

D Visual M Version 6.2 New Features

Visual M Server—General D-1
Control Visual M Server Namespace, Halt, and M Process Spawning . D-1
Restart Visual M Applications When You Stop and Restart the Visual M Server D-2

Visual M Server—Foreground Mode D-3
New VBFORE.PIF File for the Foreground Visual M Server Icon D-3

Visual M Server—Background Mode D-3
New VBBACK.PIF File for the Background Visual M Server Icon . . . D-3
Stop the Visual M Server with the Stop Entry Point D-4

Visual M Server—Automatic Startup D-4
Automatic Startup Altered in VISUALM.PIF File D-4

MDeskTop Control D-5
Update NameSpace Property at Design Time Only D-5
LoadOption Property Allows you to Load Object Code Only D-5
Define Routine Prefix in the Prefix Property D-5

Open M DeskTop Editor D-6
Tools Menu D-6
Creating an M Code Tool Menu Item D-7
Press F5 to Run Your Visual M Project D-9
Text Coloring Reflects Syntax and Errors D-9
Tile Item on Window Menu D-10
Namespace Indicated with Bar Syntax D-10

Open M DeskTop D-11
Open and Save As Dialog Boxes Improved D-11
Settings Saved Between Sessions D-11

M Event Programming D-11
Control Names May Not Contain an Underscore D-11
$$MsgBox Window is Modal D-11
Arguments Passed to M Event Routines by Reference D-11
Attempting to Access an Inaccessible Property Produces Error D-12

Using Visual M DLL Calls in Applications Other Than Visual Basic D-12

Visual M Version 6.2 Corrections D-16
Visual M Version 6.2 Known Problems D-17
